

DREAMS...

**...COME TRUE. WE ARE WORKING ON IT EVERYDAY.
HOPEFULLY SOON WITH YOU!**

Do you have a PhD, MBA or Master's degree in mechanical engineering, industrial engineering, electrical engineering or a comparable subject and are now looking to launch your career? Then the Management Evolution Program (MEP) is just the thing for you!

WE OFFER:

- Duration of 18 months, divided into three challenging projects in different divisions, departments and countries
- The program will be individually tailored to your interests and skills
- Starting date is flexible
- International experience through at least one project abroad
- Build up a company-wide network
- Professional and personal development is cultivated through training, an individual development plan and a mentor
- Permanent contract
- Worldwide job options after the program

WE EXPECT:

- One to two years of work experience or practical experience through challenging internships and work-study programs
- A stay abroad of at least six months
- Fluent English skills and preferably another language
- A very good degree in mechanical engineering, industrial engineering, electrical engineering or a comparable subject
- A team player with high flexibility and willingness to learn
